

Laboratory for Vascular Translational Science, INSERM U1148 is seeking a highly motivated

Research engineer for a project on Tissue Engineering

Biomaterials for wound healing

The Laboratory for Vascular Translational Science (www.lvts.fr) in Paris offers a position of Research Engineer in the Team Cardiovascular Bioengineering (head of the team: Didier Letourneur).

This project is funded by the ANR (Agence National pour la Recherche). This is an 18 month position (starting from January 2024).

In this project, the wound healing properties of innovative biomaterials will be assessed in vivo

Application requirements are:

- Master's degree (or equivalent) in biology, biochemistry, pharmacy, biomedical engineering or comparable discipline
- A background in biomaterials sciences
- Hands-on experience in *ex vivo* and *in vivo* models of wound healing
- Experience on the evaluation of adhesive properties of biomaterials would be a plus

To apply, please send your CV and cover letter to teresa.simon-yarza@inserm.fr
